Thanks Brent for your final edits and comments. I went ahead, included Tina's edits too. Please see summary below and attached, if no revisions or additions I will coordinate with Erica in Air for final meeting notes.

Meeting Notes:

The Muscogee (Creek) Nation is constructing a meat processing plant on tribal trust land south of Tulsa, OK. The plant site is near the Nation's Duck Creek Casino. The facility is scheduled to open/operate in October- November 2021. Water Division- Brent Larsen discussed general facility construction, concerning NPDES permits information, activities on site, and lagoon discharge. If impoundment is total retention advised by 6WD that no NPDES permit is not required.

- Tribe confirmed permits for construction storm water from both EPA and ODEQ.
- EPA issued the 2021 Multi-Sector General Permit (MSGP) for industrial stormwater discharges on January 15, 2021. Storm water associated with industrial activity would need this permit if discharged to a water of the US.
- Please coordinate with Water Division for more technical assistance and additional questions.
